Projects

WorldSkills Hub
Performed User Acceptance Testing (UAT) during WorldSkills projects to ensure product quality and compliance with business requirements. Prepared and executed comprehensive test cases to validate functionality across diverse scenarios. Utilized Cypress for automation testing to enhance efficiency and test coverage. Managed defect tracking and bug reporting through JIRA, ensuring clear communication with development teams and timely resolution of issues.

Inficurex
Conducted Exploratory Testing during Inficurex projects to uncover critical issues and improve overall application stability. Designed detailed test cases and comprehensive test plans to cover functional, regression, and edge-case requirements. Utilized JIRA for effective bug reporting and tracking, ensuring smooth collaboration with cross-functional teams and supporting timely defect resolution throughout the development lifecycle.

Certifyi
Conducted Exploratory Testing for the Certifyi project to identify defects and ensure application reliability. Created detailed test cases and comprehensive test plans to validate functionality across a variety of scenarios. Utilized JIRA for accurate bug reporting and tracking, promoting effective collaboration with development teams. Additionally, prepared structured and concise release notes to support smooth product delivery and clear stakeholder communication.
